

weberklin ceraplus

Product Description

Weberklin Ceraplus is a specially formulated ceramic surface cleaner and stain remover. It can be used on all types of ceramic material like tiles, bathtub, wash basins etc. Salt buildups due to stagnant water / continuous exposure to water can be removed with ease.

Features & Benefits

- Easily removes even tough cement stains
- No etching of ceramic products
- Does not effect the glaze of tiles
- Removes all residual substances, like soap, scum deposit, mineral and salt deposits easily.

- When used before grouting tile joints, provides contamination free grout, with longer life and better color performance.

Area of Application

- Deep cleaning of stained ceramic surface like tiles
- Removing tough stains from bath tubs, wash basins, WC, sanitary ware and other ceramic fittings.
- Ideal for pre cleaning of tile joints, before grouting.
- Can also be used for routine cleaning in diluted state.

Limitations

- Always perform preliminary tests on small testing area, to check compatibility with the surface to be cleaned.
- Not suitable for artificial or natural stones, which are prone to acid etching.
- Always wash surface with plenty of water after cleaning with Weberklin Ceraplus.
- Make sure there is no residual product left, in cracks, corners, joints etc.

Method of Application

- For tough stains, apply directly onto the stain, with a sponge or cloth, and let it soak for 3-5 mins. Clean with plenty of water.
- For mild stains or spots, dilute with water in the proportion 1:1 by volume, and apply onto the stain, with a sponge or cloth, and let it soak for 3-5 minutes. Clean with plenty of water.

Technical information

Colour	Blue
Specific Gravity	1.05 @ 27°C
Soaking time	3-5 mins

Shelf life

1 year from month and year of manufacturing, for sealed bottles, stored in dry condition, away from direct sunlight.

Condition of sale

Sold Subject to the company's condition of sale which are available on request
