

Product description

weberdry PUR fabric 65 is polyester, non-woven Geotextile (60-65 gr/m²).

Advantages

- Simple application.
- Good absorption and compatibility with weberdry PUR coatings.
- Excellent tear strength.
- UV-stable.

Uses

weberdry PUR fabric 65 is mainly used as a reinforcing fabric for use in combination with the weberdry PUR liquid-applied waterproofing membranes.

Applied in combination with weberdry PUR liquid-applied waterproofing membranes on:

- The entire surface to be waterproofed or applied locally on:
- Wall-floor connections.
- Wall-wall connections.
- Around pipes outlets and chimney stacks.
- Light-domes and air condition units.
- Waterspouts (siphon).
- 90° angles.
- Inside movement joints and over cracks, etc.

Method of application

Reinforcement of waterproofing membrane

Reinforce the weberdry PUR liquid membrane with the weberdry PUR fabric 65 on the entire surface to be waterproofed or locally at problem areas, like wall-floor connections, light-domes, chimneys, pipes, waterspouts (siphon), etc. In order to do that, apply on the still wet weberdry PUR membrane, a correct cut piece of the weberdry PUR fabric 65, press it to soak, and saturate again with enough weberdry PUR membrane.

Consumption

1.05 – 1.1 m² / m²

If applied on the entire surface, a 5-10 cm overlapping between the fabric strips must be calculated.

Compatibility

As reinforcement inlay for following products:

- **weberdry PUR seal**
- **weberdry PUR seal 2K**
- **weberdry PUR seal B2K**
- **weberdry PUR seal B1K**
- **weberdry PUR seal aqua**
- others

Packaging

weberdry PUR fabric 65 is supplied in rolls of 0.2 m x 100 m length. Rolls should be stored in dry and cool rooms for up to 12 months. Protect the material against moisture and direct sunlight. Storage temperature: 50-30°C. Products should remain in their original, unopened packaging, bearing the manufacturers name, product designation and batch number.
